

Helping Others

What You Learned

1. People can give in many ways in addition to giving money.
2. A charitable organization works for a specific cause or for the common good.
3. An example of a charitable organization is a nonprofit organization that helps animals.

Talk about It

Ask your parents:

- How often do you help others?
- How do you decide when to help others?
- How have you enjoyed helping others the most?

Do It

- With your parents, choose one way to help others. Then create a time to do it.
- Learn about charitable contributions in your community. Which one matters to you most? Why? How can you help that organization?
- When schools or clubs ask for help with a fundraiser, jump in and do your part.

My Notes:
